NSA has requested that we review the attached. We have done so and the only thing that we found was that some information being reported was sourced to "Chinese sources" not further identified. We see no reason to hold any of this. Could we have your reaction.

Dear [Redacted]

Enclosed you will find several pages which are part of a file that we intend to release to the National Archives and Records Administration. The contents of the file, which was discovered in the records of the Joint Intelligence Center, Pacific Ocean Areas, consist of record copies of secure teletype (SIGTOT) messages between the Estimates Section of JICPOA and the Intelligence Section of the staff of the Commander in Chief, Pacific, at Pearl Harbor. The messages were sent during the period March - August 1945.

The portions of the file of concern to your organization pertain to operations of the Foreign Broadcast Information Service and the Office of Strategic Services in the Pacific Area. The pages in the file which we intend to release are 031 (OSS), 104 (FBIS), and 169-172 (OSS). Although not all the pages are marked as to their specific classification, the entire file is classified SECRET overall.

This agency's declassification guidelines preclude unilateral declassification and release of any material originated by or relating to other government agencies. We would appreciate it, therefore, if you would review the enclosed documents to determine whether you concur in their declassification and release. We have outlined or highlighted those portions which we feel require your review.

If you have any questions, please contact our project officer, [Redacted] who may be reached on 688-7553 or (secure) 972-2268. Your cooperation will be greatly appreciated.

Sincerely,
